EDUCATION

Brigham Young University

B.S., Applied and Computational Mathematics Emphasis (3.9 GPA)

Provo, UT

Dec 2019

EXPERIENCE

Emergent Trading

Intern

Chicago, IL

May 2019 - Aug 2019

- Built an interactive tool to observe movement in Brazilian currency futures using the Bokeh Python library
- Wrote fast and extensible analysis code in C++ to track competitor's responses to market conditions in the Chicago Mercantile Exchange

CamachoLab, Brigham Young University

Research assistant

Provo, UT

Jan 2019 - current

- Simulated field profiles of photonic chip components using a deconvolutional neural network
- Built SLURM_gen, a tool for generating and managing simulation datasets in a high-performance computing environment

Cobalt Speech and Language

Modeling Intern

Provo, UT

Apr 2018 - Nov 2018

- Improved accuracy of a neural network model for autonomous drone recognition of air traffic control speech from 24% to 6% error, using class-based (Thrax) language models
- Wrote Go scripts to validate and generate spec files for a natural language understanding engine
